Database HANA DB exclusive

Device Type(s) Desktop, Smartphone, Tablet

App ID F0402A

PRODUCT FEATURES **IMPLEMENTATION INFORMATION** **RELATED APPS**

Detail View **List View** **Try New List View**

Once you select the required application, the details of the application will be populated on the Detail page.

There are two options, Detail View and List View.

Detail View: It shows the Application details, Database, supported devices, Product Features, Implementation Information and related apps.

List View: It shows the same information in Tabular format.

The screenshot shows the SAP Fiori Overview page. At the top, there are filters for Product Suite (SAP S/4HANA), Application Type (SAP Fiori - Transactional), UI Technology, Line of Business, Role, SAP Fiori lighthouse apps, and Required Back-End. A note says "Please make sure to select the required Product Suite for analysis". Below this, a table lists "Apps (1) | Current Selection". The table has columns: App, App Launcher Title - Subtitle, Lighthouse, Required Back-End, Description, and Screenshots. One row is selected: "My Inbox - Approve Purchase Order" (Transactional). The description for this app states: "With the transactional app My Inbox, you can make important decisions via mobile or desktop devices anywhere and anytime. Using this app, you can process your standard and custom...".

So, now you can select the S4Hana version through the dropdown.

How to check S4Hana version:

Go to SAP LOGON → System → Status → Product Version → Installed Product Version → Check for SAP FIORI for S4Hana (for eg: release 1909)

Click on Implementation Information and check the SAP Fiori Overview.

The screenshot shows the SAP Fiori Overview page with a search bar for "purchase order" and a filter for "Filtered by: Application Type (SAP Fiori - Transactional)". On the left, a sidebar lists various purchase order-related apps. On the right, under "App Details", it shows the app launcher title as "Approve Purchase Contracts, Approve Purchase Orders, Approve Service Entry Sheets, Approve Supplier Invoices, Approve Quotations" and the application type as "Transactional (SAP Fiori: My Inbox)". The "IMPLEMENTATION INFORMATION" tab is highlighted with a red arrow pointing to it. The tab contains sections for SAP Fiori Overview, Important SAP Notes, Installation, Configuration, Extensibility, and Support.

Go to Installation → find the FrontEnd and BackEnd Components.

 Installation

The app consists of front-end components (such as the user interfaces) and back-end components (such as the OData service). The back-end and front-end components are delivered with separate products and have to be installed in a system landscape that is enabled for SAP Fiori.

Front-End Components

Product Version	SAP FIORI FOR SAP S/4HANA 2023 SAP Fiori for SAP S/4HANA 2023
Support Package Stack	01 (02/2024) FPS
Software Component Version	UIBAS001 758 - SP 0000
Prerequisite for installation	SAP FIORI FOR SAP S/4HANA 2023 - SPS 01 (02/2024) FPS is an <i>Add On</i> to SAP FIORI FES 2023 FOR S/4HANA - SPS 01 (02/2024)

Back-End Components (ABAP)

Product Version	SAP S/4HANA 2023 SAP S/4HANA 2023
Support Package Stack	01 (02/2024) FPS
Software Component Version	S4CORE 108 - SP 0001

Share this components information to Basis Team, they will activate the standard application.

How to Check FrontEnd and BackEnd Components are available or not:

Go to SAP LOGON → System → Status → Product Version → Installed Software Component Versions → Search for Software Component Version

Go to Configuration → you will find the application technical names and oData service names and technical catalogs.

The screenshot shows the SAP Fiori Configuration interface. It includes sections for SAPUI5 Application (with a table of ICF nodes) and OData Service(s) (with a table of OData services). Red arrows point from the text in the first two paragraphs to the respective tables in the screenshot.

Component	Technical Name	Path to ICF Node	SAP UI5 Component
SAP UI5 Application	CA_FIORI_INBOX	/sap/bc/ui5_ui5/sap/ca_fiori_inbox	cross.fnd.fiori.inbox

OData Service	Version	Software Component Version	Back-End Authorization Role (PFCG)
/IWPGW/TASKPROCESSING	0002	IW_PGW 100	
C_PURCHASEORDER_FS_SRV	0001	S4CORE 108	

Based on the Technical names you can find the application in SAP GUI BSP applications and you can import the applications into the Fiori Launch Pad.

How to Check FrontEnd and BackEnd Components are available or not:

Go to SAP LOGON → T-Code (/n/IWFND/maint_service) → Search OData technical service name → If not go to add services → enter the service name → save.

How to Activate Fiori App:

Go to SAP LOGON → T-Code (/n/SICF) → Enter in Service Name: App technical service name → Execute → If not activated, right click and activate service

How to Create new Custom Catalog and Group:

- Go to Launch Pad Designer (T-Code: flpd_cust)
- Click on Create Catalog Icon (+)
- Enter Catalog Title and ID → save it for reference in notepad
- Then do create references for this catalog using the Standard app
- Go to Group Section
- Click on Create Group Icon (+)
- Enter Group Title and ID → save it for reference in notepad

karrinайдунк@gmail.com

How to Add Fiori App in Custom Catalog and Group:

- Go to SAP Fiori Launchpad Designer
- Firstly, copy the Technical Catalog name.
- Search the Technical Catalog name in the Catalog Section Search Bar after logging into the LaunchPad Designer.
- Go to Target Mapping.
- Select the application with the help of Semantic Object and Action and UI5 name.
- After selecting the application, click on Create Reference button.
- Select the Custom Catalog name you created.
- Done, Reference is created automatically in your created custom catalog.
- Similarly, do the same for reference for Tile.
- Go to Tiles → Search for UI5 Technical name → Create Reference → Select Catalog → Done
- Go to Group Section
- Select the Custom Group you created
- Click on add Tile and select the Application.

How to give access of created Tile, Catalog, Group app to the End user:

- Go to SAP Logon
- Use T-Code: pfcg
- Create a new role in Role section (eg: zrole_standard_cust_apps)
- Select the single role
- Go to Menu
- Go to Transactions → SAP Fiori Launchpad → select Launchpad Catalog → paste the Catalog ID you saved while creating the catalog on notepad → Save
- Go to Transactions → SAP Fiori Launchpad → select Launchpad Group → paste the Group ID you saved while creating the group on notepad → Save
- Go to User section
- Enter the user ID whom required the access → Save
- Go to Fiori Launchpad and Logon with the user access → check the group and tile is visible or not.
- Run the application and test it.

Go to Extensibility → you can find the extension points on views and controllers, if you want to extend the standard Fiori application.
